I, Elias G. No. 08/340,242, filed on November 16, 1994, which is in turn a continuation in part of Ser. No. 08/062,577, filed May 17, 1993, now U.S. Pat. No. 5,422,934, issued June 6, 1995. I further declare, as follows:

1. I understand the contents of the originally filed Specification submitted in the application on June 20, 2001, which I have reviewed, and I understand the claims referred to in this Declaration and I do not know, nor believe, that the claimed invention was ever known or used in the United States before the invention thereof, or patented or described in any printed publication in any country before the invention thereof. I further acknowledge my duty to disclose information of which I am aware, which is material to the examination of this Application.

2. I believe that the '729 Patent to be wholly or partly inoperative or invalid by reason of claiming more or less than I had the right to claim in the patent.

In particular, inadequately claimed subject matter includes up-link transmitters and down-link receivers operating in conjunction with a cellular device. The cellular device can be coupled with up-link modulators and down-link demodulators. Configuration of these and other components and features may be used to interface with selected accessories and devices including a remote handset, a pen-based data entry module, voice mail systems, answering machines, computers, video sources and so on.

4. I hereby state that all and any errors corrected by the present Reissue Application were inadvertent and arose without deceptive intention on my part. I further state that I have reviewed and understand the contents of the above-identified specification, including the claims, as amended by the amendments referred to above. I acknowledge the duty to disclose information which is material to the examination of this application in accordance with 37 C.F.R. 1.56(a).

5. I hereby claim priority benefits under 35 U.S.C. 120 to application Ser. No. 08/340,242, filed on November 16, 1994, which is in turn a continuation in part of Ser. No. 08/062,577, filed May 17, 1993, now U.S. Pat. No. 5,422,934, issued June 6, 1995.
